Have You Taken God's Super Vaccines Yet?

The sermon theme for May was "Have you taken God's super vaccines yet?" As many have gone online for an extended period, let us pray that our members would be kept by God's love, power, light, wisdom and sovereignty and they would overcome fear, helplessness, missteps, bewilderment and sadness!

Through Sarah, the International Sustainable Development Studies Institute (ISDSI) has invited our church to host their foreign exchange student to embark on a series of social outreach initiatives under their internship program. By God's grace, we have successfully conducted a series of workshops to prepare local high school graduates in their transition to university education. These workshops covered various aspects including English proficiency, time management, scholarship application, college life and

financial stewardship. In addition to payment for using our church premises, ISDSI has blessed our church with an honorarium. Let us pray that we shall reap great harvest as we have sown seeds of faith with practical loving acts!

As part of our development strategy, we thank God that Naomi and Henry have risen to lead praise and worship during our worship services. With diligent preparation, Naomi and Henry have exceeded expectations as they led in Thai and English respectively. In addition, apart from Sarah, Naomi and O Wirati preaching this month, Henry preached his first sermon on the 30 May 2021. He has demonstrated humility in learning during his preparation and great passion during his delivery. Let us pray that he will be raised for God's work in our church!
